

Dear Participant,

As disease-related malnutrition in the area of oncology nutritional therapy consistently plays a key role in patient care, we would like to kindly ask and encourage you and/or your colleagues to include oncology patients in our upcoming nutritionDay on **November 10th 2011**.

On the basis of this data, we will support the European Society of Parenteral and Enteral Nutrition (ESPEN) with the development of **nutritional care guidelines** for oncology patients. These guidelines will subsequently be available for you, your medical team and nursing staff to optimize the nutritional therapy for cancer patients based on the data collected. In addition, we plan on creating a new **nutritionDay questionnaire for the oncology** patient population.

Our goal is to include these new oncology data collection sheets in nutritionDay 2012. In addition, you will be able to compare your data assessed in 2011 to that of 2012. This will give you a head start on optimizing the nutritional care of your oncology patients with your evidence based data!

Join in and benefit!

The nutritionDay Team
