Patients to Parliament -
A quality improvement strategy for optimising nutritional care

The Initiative
Building on the work of its ‘Malnutrition Matters’ campaign, BAPEN has developed and delivered a national quality improvement strategy and implementation programme to ensure safe nutritional care is delivered for patients in England. It is an ambitious nutrition improvement programme that, when completed, will place England as a global leader in nutritional care, delivering outcomes that are unparalleled and beyond our current expectations.

Rationale/background to the Initiative
Following the delivery of a very successful ‘Malnutrition Matters’ campaign to raise awareness of malnutrition BAPEN, at one of its ‘Think Tank’ meetings, identified barriers to achieving good nutritional care in England, including gaps in available resources, a lack of baseline data, poor understanding amongst executive level NHS managers and commissioners and a lack of nutritional outcome measures. BAPEN therefore turned its focus to driving quality improvements in the NHS to ensure the delivery of safe nutritional care at a national level.

Results: Key achievements
BAPEN’s innovative initiative has brought together Improvement Scientists with Nutrition Experts to drive quality improvements in nutritional care across England.

Key outcomes:

• Use of the BAPEN toolkit to meet quality standards in nutritional care: a set of practical tools for commissioners and providers to assist local need and commission appropriate nutritional care, promoted by the Department of Health, hosted on NHS Evidence and widely utilised.

• BAPEN’s OFNOSH and ‘Digesting OFNOSH’ (Organisation of Food and Nutrition Support in Hospitals) promoted in the national improvement programme to support teams to organise for good nutritional care.

• BAPEN’s ‘MUST’ e-learning modules for hospitals and community provided to participating organisations in the national pilot.

• BAPEN Nutrition Screening Week 2010 and 2011. 

Implementation: a programme of BAPEN activities
BAPEN’s work programme – Understanding drivers for change

AIM
To develop a framework to implement nutritional screening and delivery of high quality and safe nutritional care across England

Leadership at all levels

Measurement: baselines & assessment of need

Clinical care systems

Developing nutritional care pathways that span health economies

BAPEN influencing the political agenda

• An All Party Parliamentary Group to lobby for good nutritional care

• Key stakeholders in a proposed nutrition commission

• Advising the Secretary of State for Health re: Malnutrition

• Calling for the appointment of a national lead for malnutrition

• Embedding nutrition in the Quality Outcome Framework

BAPEN leading the development of Malnutrition Resources

• Reports e.g. Combating malnutrition

• Commissioning toolkit: Meeting Quality Standards in Nutritional Care

• ‘MUST’ online calculator

• Seasonal nutritional screening weeks

• OFNOSH - a practical guide to ensure good organisation of food and nutritional support in hospitals

BAPEN leading the delivery of a national nutrition improvement programme

• Embedding nutrition and hydration into a Department of Health National Improvement Programme

• Increased use of ‘MUST’ screening tool

• Embedding modules for frontline staff

• Implementation of ‘OFNOSH’

BAPEN measuring nutritional outcomes

• Advising the regulator (Care Quality Commission) development of the observation tool for the national standard

• Advising the Department of Health development of Nutrition Nurse sensitive indicators for nutrition

• Development of a national exemplar CQUIN for nutritional outcomes

Conclusion
BAPEN’s innovative & strategic focus on quality improvement in the delivery of safe nutritional care in England has delivered:

1. A sound base upon which to build the evidence for improvement science and nutritional care

2. A long term strategic commitment to developing nutrition policy at a national level

3. Alignment of policy, standards, guidelines and regulations leading to the delivery of improved nutritional care

4. Commissioners, senior NHS Executive leaders, clinicians and patients working together to deliver unparalleled nutritional care

5. An implementation framework and a Call to Action to colleagues in other PEN Societies: No NHS national care organisation can claim it is delivering safe, effective, quality care without appropriate nutritional care policies in place.
