

## SIG-MN Minutes - Zoom meeting 24 mars 2025 – 17:00-17:50

Present: Karin Amrein, Angélique de Man; Michael Casaer, Kristine Koekkoek, Liis Lepp, Serge Rezzi, Miriam v.d.Werf

Excused: Oguzhan Dizdar, Kursat Gundogan, Alan Shenkin, Christian Stoppe; Arthur van Zanten

**Info:** web-page accessible at [www.espen.org/micronutrient](http://www.espen.org/micronutrient).

In charge: IT specialist Robert Fuchs and IT officer Mihailo Bezmarević:

**MN-web APP:** financing are accepted by MNI –Anna Schweinlin (AS) and me have been working on it. Not yet interactive. App is under responsibility of AS.

### LLL 44-MN:

The course sent 11NOV to Regina Komsa & Remy Meyer has been approved. Globally too many slides for non-MN specialists – suggest masking of slides.

The full course will be delivered May 2025 in St-Gallen during Nutrition 2025 (24 May). .... and probably in Tallin (18-19<sup>th</sup> August - Liis Lepp: AdM speaker?)

- MB: Prepare feedback note for St-Gallen (new LLL)

**Official first LLL-44 ESPEN delivery in Prague: 15SEP/ 13:30 - 15:30:**

*Live-LLL: Micronutrients in clinical nutrition: MB Moderator & speaker for 1&3 (Karin Amrein for Vitamins, and Michael Hiesmayr for Acute disease)*

**Comment from Rémy:** too many slides for Prague– we have only **25 min per lecture** and 5 min discussion after the presentation

Rest of program not yet available, but MB participates home PN session 13SEP: 14:00 - 15:30: for Micronutrients status.

### Prague SIG-MN meeting:

- Saturday 13 Sept.: 12:00-14:00 **OR** Sunday 14 Sept.25: 12:00-14:00 : **14-09-25 validated 02MAY**.

**Endorsement of projects:** concept validated by the group, as this endorsement is an argument when facing potential funding bodies. Ideally projects should be sent to us in their finalization phase, so that advice can be given.

**MIMOSA Project** (Pr. Patrizia d'Amelio, CHUV) sent to the group – approval (or not) to be sent to MB this week (KA, MC, do support it)

Other projects: Angélique, Miriam – both will send their protocols **(see below)**

MB will contact ESPEN executive for validation **(done and approved)**

### Varia - news:

**Liis** – MN availability for outpatients compromised by new EU regulations – EFSA does not seem to realise that reco for the population impacts outpatients with higher needs - MB will contact Nestlé and FK for more info. and then EFSA

**Karin:** VITALIZE has recruited n=1850 i.e. 75% of target – Germany recruiting very efficiently (patient fee was overtaken by the German Bundesministerium) – one more year to go.  
**BRAVO!**

**Next meetings:**

Web-meeting after first LLL **16 June** – MB will send agenda “blocker”

**SIG-MN** meeting in Prague in 2025 – **13 or 14 SEP**

Thank you for attending - Best to all. Mette.

25MAR25

**15APRIL25:** Two research projects were submitted to SIG-MN, circulated in the group, and endorsed:

- Maintaining Immune and Mitochondrial functions in Old adults with SAfe nutrition: the MIMOSA study – Prof. P d’Amelio - CHUV
- Optimal micronutrient status for all: Determination of functional micronutrient status for precision medicine in critically ill patients – Dr M. van de Werf & A. de Man - UMC

**Superlined = Done or Validated post meeting**
